

Camphill Farm Community  
Hermanus

*'Quality of life for adults with intellectual disabilities'*

To all our friends & colleagues,

Regarding increasing concerns and uncertainty around the COVID-19 strain of the Coronavirus:

We are basing our preparations on information available to us at this time from trusted and reliable sources and we are closely monitoring the situation as it unfolds around the world, in South Africa and of course here in the Overstrand region.

Every person here on the estate has been fully briefed as to what COVID-19 is, as well as on basic preventative hygiene methods (regular handwashing, where to cough, keeping a certain distance from one another, what to do if not feeling well etc).

Should any residents, staff or volunteers display any sign of the symptoms of COVID-19, the necessary action will be taken immediately.

Current circumstances are such that we are considering restricting access to the Community. This may involve family members, visitors and service providers needing to formally apply each time they wish to enter the estate. We are also restricting egress from the estate, i.e. necessary and unavoidable trips only at this stage.

The Camphill Dialogue 2020 conference has unfortunately been cancelled.

Please feel free to contact me directly with any queries.

Obviously, these are trying times – for everybody! Thank you for your patience and calmness during this time of the unknown.

Regards,

Sam
